CLASSROOM RESPONSE SYSTEM

WOULDN'T YOU LIKE
TO KNOW IF YOUR
STUDENTS UNDERSTAND?
NOW YOU CAN!

“THE **2KNOW!** CLASSROOM RESPONSE SYSTEM **IS** FUN AS WELL AS EDUCATIONAL. THE STUDENTS LOVE IT. IT’S **VERSATILE** BECAUSE IT CAN BE USED WITH ANY SUBJECT.”

Judy Lissman • Lead Teacher
Southeast Goshen School • Yoder, Wyoming

USE INTERACTIVE TECHNOLOGY TO KEEP EVERY STUDENT INVOLVED AND ENGAGED!

CLASSROOM RESPONSE SYSTEM

Imagine a classroom where you connect with all of your students as they participate simultaneously and confidentially...where all of them are excited and motivated to learn...and where you receive a steady stream of feedback to personalize instruction—all in real time. Now you can do all this and much more with the 2Know! classroom response system!

The 2Know! system consists of wireless handheld responders, easy-to-use software, and a receiver that plugs directly into your classroom computer. With 2Know!, you'll know which students aren't comprehending your instruction, so you can better target those students for personalized attention right away.

At last, you'll have the timely information you need to accelerate learning, increase self-confidence, and make learning and teaching fun again!

GREAT FOR QUIZZES, TESTS, HOMEWORK, EXERCISES, SURVEYS, AND MORE!

Renaissance Responder

Presidents Quiz (25 of 34)
 Which president issued the Emancipation Proclamation?
 A. Abraham Lincoln
 B. Theodore Roosevelt
 C. Thomas Jefferson
 (A) (B) (C) (D)

NEW! Short-Answer functionality utilizes two-way radio-frequency communication and a screen to display questions, with plenty of room for responses—much like text entry on a cell phone.

Large LCD display allows questions to be fully viewed on display—eliminates need for paper, projector, or TV.

No aiming required. Works on Radio Frequency, which means there's no aiming required and no line-of-sight issues.

Buttons designed, arranged, and color-coded for fast, easy use.

Question types include multiple choice, True/False, Yes/No, ranking, numeric response, and short-answer.

Easy scroll feature allows students to view longer questions and answers.

Works as a multi-function calculator that can be disabled during testing.

NEW! MathFacts in a Flash version allows students to practice their math facts anytime, right from their desks or anywhere you choose.

Lightweight and ergonomically designed—ideal for one-hand use, frees other hand for writing.

Uses just two AA batteries, which will last the entire school year!

Automatic power off after 30 minutes of inactivity.

The 2Know! classroom response system was honored with a Teachers' Choice Award from *Learning® Magazine* in 2008 and a Best of 2009 Teachers' Pick Award by *Scholastic Instructor Magazine*.

INSPIRE AND MOTIVATE EVERY STUDENT TO SUCCEED

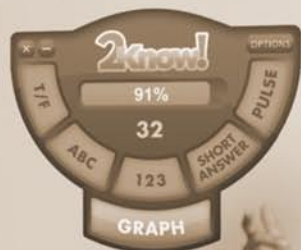

Students enjoy the interactivity provided by the 2Know! classroom response system. Teachers enjoy the full participation of all their students, as well as the automatic scoring provided by the software. Students enter their answers to teacher-transmitted tests, quizzes, and assignments, as well as “on-the-fly” questions teachers ask in class.

With the 2Know! classroom response system, you can:

- **Build excitement for learning.** Even students who never participated before love using the responders and become actively engaged in the learning process.
- **Receive instant feedback.** State-of-the-art communication technology helps you target your instruction more effectively to individual students, resulting in effective, one-to-one, personal teaching moments.
- **Create “on-the-fly” quizzes.** The 2Know! Toolbar allows you to ask questions without entering any content, and students provide the answers using responders.
- **Generate formalized assessments.** Produce reusable questions and answer choices from 8,000 ready-to-use content items, and from your own content. Items can be fully viewed on students’ handheld responders, eliminating the need for paper, projector, or TV.
- **Enjoy better technology for less.** Radio Frequency (RF) technology is not affected by line-of-sight obstructions. One receiver can handle communication from hundreds of responders, making it more reliable than infrared-based systems.
- **Assess progress toward standards.** Download and import your state or national standards and align your content to the standards using the included AccelTest software. Reports provide data on students’ performance to the standards.
- **Increase daily math practice.** With MathFacts in a Flash functionality, you can provide students with additional opportunities to practice their math facts on their own.
- **Allow open-ended answers.** Now you can further engage your class and allow students to utilize classroom-specific technology in a similar manner as they use technology outside the classroom.

“**STUDENTS LOVE** THE INSTANT FEEDBACK. IF THE STUDENTS DON'T KNOW THE ANSWER, **THE SYSTEM** GIVES THEM THE OPPORTUNITY TO GET THE CORRECT INFORMATION IN A NON-THREATENING WAY.”

Kennan Goodman
Northridge Middle School
Charlotte, North Carolina

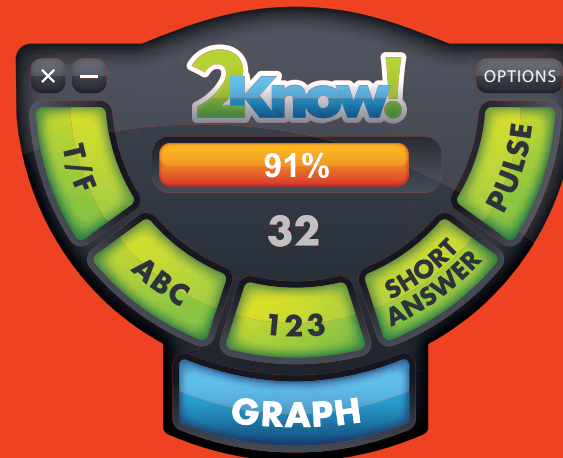

THE 2KNOW! TOOLBAR HELPS YOU GAUGE YOUR STUDENTS' UNDERSTANDING

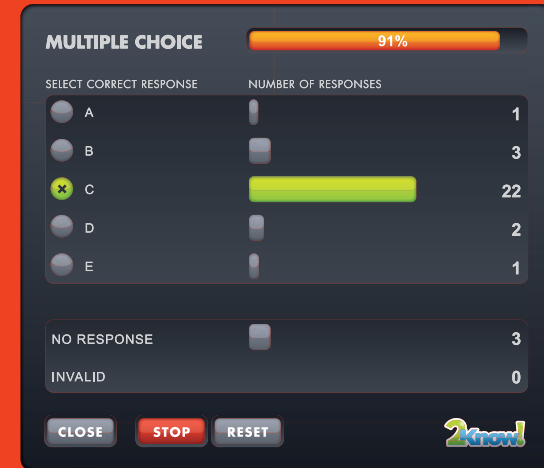

Within minutes after installation, 2Know! helps you enhance understanding, encourage participation, and build more excitement for learning. You simply ask a question and students provide answers using their handheld responders.

The 2Know! Toolbar floats above other applications on your computer screen or even projects in front of your audience. It's ideal for use with interactive whiteboards, as well as a standard classroom computer. By designating a responder as a teacher remote, you can interact with students while controlling the software as you move about the classroom.

The 2Know! classroom response system also includes AccelTest software, which runs on your desktop computer (Windows and Macintosh). AccelTest makes it easy to set up formal quizzes, tests, and other exercises in just minutes. Students' answers are then computed and saved automatically, so you can verify class performance. You'll spend less time on paperwork and record-keeping and more time doing what you love—teaching!

The 2Know! Toolbar requires no setup and allows you to assess students “on the fly” without entering any content.

Response data is available in several easy-to-read graphical formats so you can see if students understand what you're teaching.

Use the “Pulse” feature any time you want to ask your students if they understand the concept you are trying to teach them. Responses tally instantly.

2KNOW!'S SUPPORT FOR SHORT-ANSWER QUESTION TYPES ADDS FLEXIBILITY TO FORMATIVE ASSESSMENT

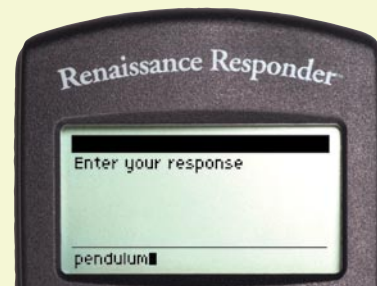

2Know!'s short-answer capability works with AccelTest software to help you:

- Seek precise information from students during the instructional cycle.
- Save time by eliminating the need to develop multiple answer choices.
- Reduce the possibility of students guessing the correct answer.
- Deepen students' critical-thinking skills as they write answers rather than selecting from a variety of choices.
- Require students to answer questions with concise, highly focused responses.

Use 2Know!'s Short-Answer Capability Across the Curriculum

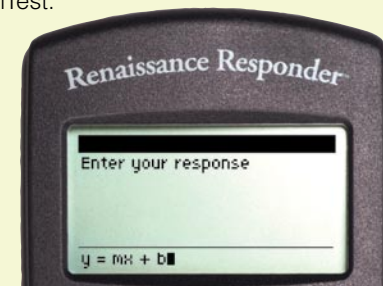

English/Language Arts

Example: Weekly spelling test. The teacher verbally communicates each spelling word and the students spell them on their Renaissance Responders and submit them to AccelTest.

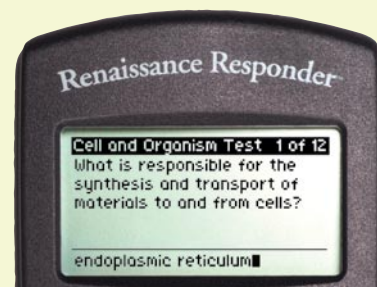

Math

Example: Verify that students understand how to determine the formula for a line. The teacher asks students to enter the formula for a linear equation using the Renaissance Responders and submit them to AccelTest.

Science

Example: Student-led test on animal cells. After teaching a lesson, the teacher uses AccelTest to create a test on the parts of a cell. Students enter their answers using the Renaissance Responders and submit them to AccelTest.

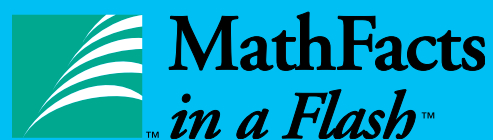

Social Studies

Example: End-of-section test on state capitals. After learning about the various states, the students enter their answers using their Renaissance Responders and the teacher uses AccelTest to determine students' knowledge of each state's capital.

2KNOW! WORKS WITH MATHFACTS IN A FLASH AND ACCELERATED MATH TO EXTEND STUDENTS' DAILY MATH PRACTICE

2Know! technology combined with MathFacts in a Flash software provides additional opportunities for vital math practice. Students simply practice their math facts using Renaissance Responders. This new functionality gives you the flexibility to coordinate multiple practice activities without tying up computers and allowing you more time to teach.

See page 11 for ordering information.

Now students can enter answers to Accelerated Math* assignments in class using the Renaissance Responder to transmit their answers directly to Accelerated Math software. TOPS reports and next assignments print immediately and you get an instant snapshot of student and class progress.

* Requires Accelerated Math Renaissance Place.

2KNOW! IS A CLASSROOM RESPONSE SYSTEM THAT ADDS VERSATILITY TO ANY LEARNING ACTIVITY

In addition to running Accelerated Math and MathFacts in a Flash, 2Know! offers a variety of additional content from many of the leaders in educational technology. With these companion applications from third-party content providers, 2Know! now gives you and your students across-the-curriculum assistance in instruction, practice, and assessment.
